**INDONESIA – MEASURES CONCERNING THE IMPORTATION OF CHICKEN MEAT
AND CHICKEN PRODUCTS**

STATUS REPORT REGARDING IMPLEMENTATION OF THE
DSB RECOMMENDATIONS AND RULINGS
BY INDONESIA

Addendum

The following communication, dated 10 July 2019, from the delegation of Indonesia to the Chairperson of the Dispute Settlement Body, is circulated pursuant to Article 21.6 of the DSU.

Indonesia submits this report in accordance with Article 21.6 of the Understanding on Rules and Procedures Governing the Settlement of Disputes (DSU).

On 22 November 2017, the Dispute Settlement Body (DSB) adopted its recommendations and rulings in *Indonesia – Measures Concerning the Importation of Chicken Meat and Chicken Products* (WT/DS484). In the DSB meeting on 22 January 2018, Indonesia informed the DSB its intention to implement the recommendations and rulings of the DSB related to this matter.

Indonesia and Brazil also informed the DSB, on 15 March 2018, their agreement for the reasonable period of time for Indonesia to implement the recommendations and rulings of the DSB. This reasonable period of time expired on 22 July 2018.

Indonesia has delivered its intention to implement the recommendations and rulings of the DSB in previous DSB meetings as well as bilateral meetings with Brazil. As provided by Indonesia, all products concerned covered in this dispute can now be imported. Importers can also modify their license at any time without any sanctions. These are reflected in the new Minister of Trade Regulation No. 29/2019 concerning Provision for Import and Export of Animals and Animal Products which came into force on 24 April 2019. It is available in English version at the Ministry of Trade website.

For distribution plan requirement, there will be no more such obligation in the new Minister of Agriculture Regulation. The draft regulation is now under enactment process.

With respect to undue delay measure, Indonesia would like to reiterate that all animals and animal products, both fresh and processed, imported into Indonesia must be accompanied with health or veterinary certificate from country of origin. The desk review process for the questionnaire submitted by Brazil has been done. Nevertheless, based on the result of the review, the Indonesian authority requested Brazil to provide further information, inter alia on the result of surveillance/monitoring of Salmonella and the recall system mechanism.

Indonesia stands ready to continue communications, and holding consultations as and when necessary, with Brazil pertaining to the matter above.
